

Solarize Meridian List of Solar Installers

These solar installers have expressed an interest in participating in Solarize Meridian and have indicated they can provide a standard, grid-tied, rooftop solar electric system at a total installed cost of \$3/watt or less. A 4,000 watt system would cost \$12,000 or less. This list has been prepared by the Lansing Area Solar Users Network (LaSUN), an informal network of solar owners, after surveying solar installers. LaSUN does not recommend or endorse specific solar installers. The homeowner will be solely responsible for selecting and contracting with an installer for a PV system.
